### **Codman, a Johnson & Johnson Co.**

Codman, a Johnson & Johnson company, is a global neuroscience device company that offers a broad range of devices and therapies to treat patients with neurological diseases and conditions. The company, which is a part of the DePuy Franchise, will work with health care providers to forge a new era of innovation in the care and treatment of these patients.

More information on Codman products can be found at [www.codman.com](http://www.codman.com).

### **DePuy Spine, a Johnson & Johnson Co.**

DePuy Spine, Inc., a Johnson & Johnson company, stands at the forefront of the worldwide spine market offering a broad portfolio of patient-focused products and solutions backed by a robust pipeline, world-class evidence-based research, education, training and customer service. The Company has a rich heritage of partnering with leading clinicians, researchers and thought leaders to pioneer new technologies, techniques and concepts that have advanced spinal care and have helped to improve the lives of millions of people with spinal disorders. The Company, headquartered in Raynham, Massachusetts, is guided by its mission to be the most trusted and respected spine company in the world. [www.depuyspine.com](http://www.depuyspine.com)

### **Dfine, Inc.**

The StabiliT™ Vertebral Augmentation System manufactured by DFine, Inc. of San Jose, CA is a new, promising technology to treat vertebral compression fractures due to osteoporosis and cancer. The system combines a unique ultra-high viscosity bone cement called StabiliT™ ER<sup>2</sup> Bone Cement with cavity creation to stabilize the fracture, potentially yield vertebral body height elevation and decrease the risk of cement extravasations. The system also provides the operator with a remote hand switch that allows for cement delivery from up to 10 feet away from the radiation source significantly reducing the risk of radiation exposure to physicians.

DFine, Inc.  
3047 Orchard Parkway  
San Jose, CA 95134  
Phone: 1 (866) 96-DFINE  
Fax: 1 (408) 321-9401

### **Spine Wave**

The StaXx<sup>®</sup> FX Structural Kyphoplasty System is an advancement in the area of vertebral compression fracture (VCF) treatment. Using a permanent, structural implant, the System is designed to achieve vertical fracture reduction in an incremental, controlled manner without intra-operative reduction loss. As such, StaXx<sup>®</sup> FX makes restoration of natural anatomy possible. In addition, compared to other vertebral augmentation procedures that are commercially available, the implant provides a cement barrier to the posterior element of the spine while decreasing the overall bone cement volume.
