

PERU – Feedback from Host Society

Dr. Ginsburg visit to Hospital Rebagliati was carried out as planned. On June 8, 9 and 10, 2015. From 14-18hours the activities around the course "Selected Topics in Head and Neck Imaging" were accomplished. The sessions were attended by staff radiologists and staff specialists in Oncology, Head and Neck Surgery, Nuclear Medicine and Radiation Oncology. Local residents in the same specialties and residents from other hospitals also participated, according to the following chart. The subjects reviewed followed precisely (100%) the programming previously distributed by The Peruvian Radiological Society. A translator was in place and helped all the time. We are very thankful for Dr. Ginsburg's time spent with us both during his didactic lectures and review of cases, where friendship was solidified.

Cordially,

Dra. Bertha M. Rodriguez Davila

	June 8	June 9	June 10
