Professor Leon van Rensburg
RSSA Congress Chair

Dear Professor van Rensburg

ASNR Visiting Professorship: Professor Wade Wong

It was a real pleasure to host Professor Wong at the University of Pretoria and Steve Biko Academic Hospital in June 2015.

Professor Wong lectured on mainly Neuroradiology and Related topics every day to the Consultants and Registrars during the afternoons, and spent time teaching and training Professor Samia Ahmad in various novel interventional techniques in the mornings. Some of the interventional techniques included kyphoplasty, sacro-iliac joint infiltrations which were a first at University of Pretoria and Steve Biko Academic Hospital.

Professor Wong gave expert opinion on many neuro-interventional cases that were being performed at the time in theatre.

Discussions regarding research and possible workshops for kyphoplasty were explored, and Professor Wong shared his great expertise in areas of management, radiological experiences, teaching and training.

During the course of the week, Professor Wong met with all the Department of Radiology personnel, and had an opportunity to view the imaging equipment, PACS and meet with the Dean of the Faculty Health Sciences, Professor Eric Buch.

The Consultants and Registrars were extremely appreciative of the lectures.

Sincerely

Zarina Lockhat
